

PATIENT PROFILE

Full Name	Azhaan Ali Siddiqui
Contact/Identifier	azhaanalisiddiqui15@gmail.com 7983595318
Demographics	Age: N/A Gender: Male Blood Group: B+

DIAGNOSTIC SCREENING SUMMARY

43%

CONFIDENCE METRIC

MODERATE RISK CLASSIFICATION

Clinical heuristic assessment for Fracture

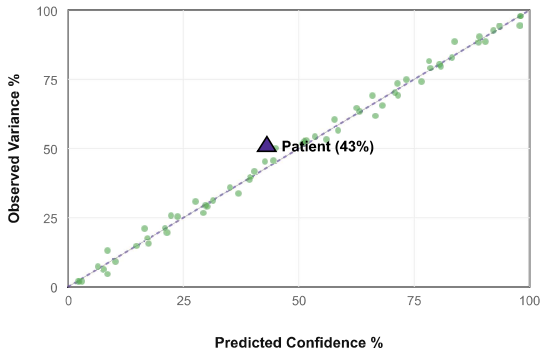

Analytical Engine: fallback-v1.0

DIAGNOSTIC IMAGING & CALIBRATION ANALYSIS

PATIENT SOURCE INPUT MATRIX

MODEL CALIBRATION CURVE (45° ALIGNMENT)

CLINICAL RECOMMENDATIONS

- 1. Schedule a consultation within the next 48 hours
- 2. Monitor your symptoms and note any changes

3. Stay hydrated and get adequate rest

SAFETY PRECAUTIONS

1. Keep the splint, cast, or brace completely dry and clean.
2. Elevate the injured limb above heart level frequently to minimize localized swelling.
3. Avoid bearing weight or using the injured area until cleared by an orthopedic surgeon.

SUGGESTED MEDICATIONS

1. Analgesics (e.g., Acetaminophen or NSAIDs like Ibuprofen) for pain and inflammation control.
2. Calcium and Vitamin D3 supplements to support rapid bone remodeling and healing.

CONSULTATION ROUTING PROFILE

No physician consultation booked yet.

CRITICAL NOTICE: This framework does not replace standard medical diagnosis, diagnostic lab analysis, or physical evaluation by licensed physicians. Clinical teams must authenticate these parameters explicitly.
